## BASIC USAGE GUIDE

**Rail Kits can be used with the Premium Hanging Kit**

Because Rail Kits are modular and come in two lengths (16 & 18 in), many custom spacing and hanging arrangements can be created.

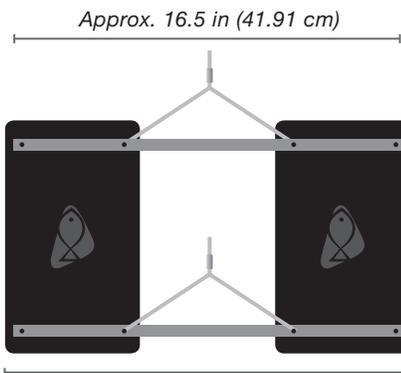

**Rail Kits can also be connected for wider spacing or to accommodate three or more Radions.**

*If you are using a Rail Kit in conjunction with the PREMIUM HANGING KIT, familiarize yourself with the hanging kit instructions before beginning. A minimum of ONE hanging kit per TWO Radions is recommended. Additionally, make sure that the hanging kit anchors are capable of supporting multiple Radion fixtures.*
